**Teaching Certificate** Participate in lecturing for the University, OSCEs, APPE student orientations, and various precepting opportunities.

**Interdisciplinary Development** Practice with various healthcare professionals through ambulatory care clinics, professional meetings, and direct presentations with various organizations.

**Faculty in Residence** Work alongside a shared faculty with the University and Ralphs Pharmacies to scale programs, explore business opportunities, and evaluate currently offered services

**Electives** Specialty at retail, managed care, FQHC

---

University of Southern California

Los Angeles, CA

Hong Nguyen, PharmD
hong.nguyen@ralphs.com

**Teaching Certificate** Proctor lectures, case conference, and OSCEs for USC School of Pharmacy as well as multiple precepting experience with Ralphs Pharmacy

**Corporate Management** Work with Corporate management staff to understand business operations, decision making, financial considerations, human resources, and program development.

**Patient Care Services** MTM, immunizations, Appointment Based Model, travel medicine, health screenings, diabetes management, fitness/nutrition/weight management coaching, independently furnished hormonal contraception and NRT.

**Interdisciplinary Care** Experiences will provide multiple exposures to other healthcare providers through direct working relationships, presentations, and possible publications for healthcare organizations.

**Electives** Pain Management, Travel Health, Medication Therapy Management, Specialty at Retail, Independent Pharmacy
**Ambulatory Care** There are two ambulatory care sites associated with the residency. Each resident staffs one of these primary care clinics one day a week throughout the residency year. Each site has fourth year pharmacy students from the University of Colorado who work under the resident.

**Transitions of Care** Residents participate in a transitions of care service at the University of Colorado Hospital. Aspects of the service include patient and provider education as well as follow up with the patient post-discharge. Residents also serve as preceptors for intern pharmacists.

**Corporate Management** Residents work closely with King Soopers corporate pharmacy leaders to implement and improve services offered to patients in the pharmacy.

**Clinical Services** Residents are immersed in developing, improving, and providing clinical services throughout the Division. This includes adult and adolescent immunizations, health screenings, MTM, and prescriptive services under Colorado standing order and statewide protocols. Residents precept students on APPE MTM rotation at King Soopers pharmacies.

---

**Teaching Opportunities** Resident participates in Teaching Certificate Program with greater-Atlanta area residents. The resident is assigned a teaching preceptor that assists in developing and perfecting teaching style.

**Ambulatory Care** Resident completes a longitudinal ambulatory care experience with Grady Health System. The setting allows the resident to become more confident with making evidence-based clinical recommendations.

**Drug Information** The resident has the opportunity to work closely with the Drug Information Center Direction to research and answer drug information questions.

**Leadership** Resident works with district Pharmacy Practice Coordinator team to develop and implement strategies to improve clinical services within six pharmacies with diverse patient populations.

**APRIE Journal Club** Resident has the opportunity to attend and present at a journal club created for all practice setting residents in the greater Atlanta area.

---

**Patient Care** During the year, the resident provides a wide variety of clinical services including immunizations, MTM, and disease state management. The resident also spends time in an ambulatory care clinic.

**Corporate Management** The resident works closely with members of Kroger division leadership to learn essential pharmacy operation and clinical service development skills.

**Research** In partnership with Purdue, the resident completes a research project, which includes IRB and grant submission as well as writing a manuscript suitable for publication.

**Teaching Certificate** Over the course of the year, the resident participates in the Indiana Teaching Certificate Program, which includes precepting, lecturing and creating a teaching philosophy.

---

**Ambulatory Care** Residents will work collaboratively with physicians and providers at a primary care clinic for disease state management and education.

**Academia** Residents will complete a Teaching Certificate through the University of Kansas School of Pharmacy, participate in Pharmacy Skills Lab and Clinical Assessment Course, and co-precept APPE pharmacy students on clinical rotation with a primary preceptor.

**Service and Research** Residents will serve on the American Diabetes Association Board during their tenure as a resident planning local events, serve as a medical staff member at Camp Discover, a diabetes camp, and complete a residency research project.

**Clinical Pharmacy Services** Residents will complete the APHA Pharmaceutical Care for Patients with Diabetes certificate program, participate and manage immunization clinics and wellness screenings, and conduct one-on-one patient visits for disease state coaching.

**Corporate Management** Residents will work closely with division pharmacy leadership to learn pharmacy operations and service development and implementation skills and application.
Kentucky

PGY1 and PGY2 Combined Program The combined PGY1/PGY2 program allows residents to spend two years progressing and developing as a community pharmacy practitioner and leader.

Master of Science in Pharmacy Administration Over the course of two years, residents will take courses at The Ohio State University to earn an MS degree in Health-System Pharmacy Administration.

Divisional Leadership Residents spend time at the division office developing leadership and management skills for operations, clinical aspects, human resources, and others.

Teaching Certificate Offered as an elective opportunity through Ohio State.

Electives Many different collaborations with ambulatory care, inpatient, urgent care, emergency medicine, and specialty pharmacy in the central Ohio area.

Ohio

University of Cincinnati College of Pharmacy
Cincinnati, OH
Ashley Johnson, PharmD
ashley.johnson6@stores.kroger.com

PGY1 Program Residents will engage in longitudinal experiences such as direct patient care, practice management, collaborating with health care providers, and precepting pharmacy students in a community pharmacy.

PGY1/PGY2 Program Residents will work closely with corporate pharmacy leadership to gain experience in clinical service development and pharmacy operations with the opportunity to obtain a Master’s in Pharmacy Leadership.

Patient Care Residents will gain valuable patient care skills conducting MTM services, coaching appointments, and disease state management services.

Teaching Certificate Residents will gain experience teaching in the College of Pharmacy Skills Center and will have the opportunity to develop and teach an elective pharmacy course.

Community Involvement Residents will take part in community outreach programs, wellness promotion, and patient education events.
Transitions of Care This Kroger site is an unique environment located inside a hospital that offers a meds-to-beds prescription delivery and bedside counseling service.

Ambulatory Care Resident will have opportunity for clinic and elective hours at the Strecker Cancer Center where time will be spent developing patient care plans as well as direct patient education regarding medications, side-effects, and side-effect management. Opportunity exists to serve on various committees.

Teaching Certificate The resident will complete the “Teach to Learn, Learn to Teach” course and receive a Teaching Certificate from WVU.

Advocacy The resident will attend Pharmacy Day at the Legislature in Charleston, WV and will travel to Capitol Hill in Washington, D.C. to advocate for the profession of pharmacy.

Camp Kno-Koma/Catch Your Breath Resident spends a week as medical staff for juveniles with diabetes or asthma. Hands on training with these disease states and medication

Prescribing Authority Residents are able to participate in 25 different services. Residents are able to recognize and treat common illnesses such as UTI or yeast infections, mild skin conditions such as bee stings, burns, swimmer’s ear, shingles and more. They can provide advice, and where appropriate prescribe medications or recommend OTC s for needs such as migraines, tobacco cessation, fluoride, seasonal allergies, and certain medication refills. Residents also regularly provide TB Screenings and Hormonal Contraceptive Prescribing.

Travel Services In addition to counseling, pharmacists prescribe medications (i.e. antimalarial, antidiarrheal, and motion sickness) and immunizations to prepare patients for safe travel.

Interdisciplinary Clinic Fred Meyer owns an outpatient pharmacy within our local interdisciplinary clinic The Vancouver Clinic (TVC). Within this site, residents provide TOC services for high risk patients and serve as a resource on a multidisciplinary team. Residents also participate in innovative pilots including medical billing, clinical workgroups, and drug shortage protocols.

Corporate Management and Leadership Residents work closely with corporate leaders at Fred Meyer to develop, implement, and expand clinical services offered in the pharmacy.

Teaching Certificate Residents are classified as Clinical Instructor and will have teaching opportunities at the College. After successful completion of the residency and teaching certificate programs will earn the South College Teaching Certificate.

Ambulatory Care Resident completes a longitudinal ambulatory care experience. This allows the resident to become confident with making evidence-based clinical recommendations.

Management and Leadership The resident has a home staffing store. This allows for a broad experience in management & leadership, focusing on roles and responsibilities. Resident works with division leadership to develop & implement strategies to improve clinical services.

Disease State Management Resident has a longitudinal experience at the pharmacy working with AADE approved sites to deliver disease state management.

Immunizations The resident has extensive opportunity to participate and facilitate off site business and industry immunization clinics.

Patient Care Services The resident is integrated into the patient care team and provides immunizations, biometric healthcare screenings, MTM, disease management coaching, travel consults, and MedSync.

Teaching Certificate After successful completion of this required component of the resident program, the resident will receive a certificate from the UTHSC COP.

Transitions of Care The resident spends 1-2 days/week in a local hospital where Kroger has a Bedside Delivery Program. Responsibilities include attending discharge rounds and identifying/resolving medication related issues.

Management and Leadership The resident has a home staffing store & an office located in the division corporate offices. This allows for a broad experience in management and leadership, focusing on roles and responsibilities.

Community Pharmacy Rounds All community pharmacy residents affiliated with the UTHSC program meet weekly via video-conference. The residents conduct the meetings & topics vary between clinical, leadership, and research.
